

# LED'S SIMULATE THE SUN!

WAVELABS will be presenting its innovative SINUS-220 LED solar simulator at the 7th annual SNEC in Shanghai. Visit us at booth 125-126 in hall E3.

The SINUS-220 combines a number of different color LEDs with high-quality optics to provide a perfect simulation of the sun.

# LED'S MEET IN SHANGHAI!

We would love to show you how you can use the SINUS-220 to perform accurate efficiency measurements and achieve greater stability for your production processes while considerably reducing your operating costs.

**We look forward to seeing you there.**

**Your WAVELABS-Team.**
